Wordly

Real-Time Translation!

CSAM-SMCA is offering live translation and captioning through Wordly, an AI-powered platform that enhances accessibility and inclusivity at the event. For this conference, Wordly will provide real-time translation and captions between English and French only.

With Wordly, you can:

- Listen to sessions in either English or French
- View full transcripts in real time

Wordly works on your own device, phone, tablet, or laptop, with no apps or downloads required.

Attending a Wordly session is easy! Just scan the QR code in the room with your mobile device's camera or a barcode scanning app. Each session will have its own QR code to connect you directly to the Wordly platform.
